Education

Aditya Engineering College

CGPA: 8.53

B.Tech, Computer Science and Engineering, Expected June 2026

Andhra Polytechnic College

Percentage: 92.4

Diploma, Computer Engineering, June 2023

Skills

- **Programming:** C++, Python, Java, SQL
- **Full-Stack Development:** HTML, Tailwind CSS, JavaScript, React.js, Node.js, Express.js
- **Databases:** MySQL, MongoDB, Redis
- **Cloud & DevOps:** AWS, Docker, Linux
- **Concepts:** Data Structures & Algorithms, OOP, Computer Networks, Operating Systems, DBMS
- **Tools:** Git, GitHub, Postman

Projects

• Event-Driven Analytics Platform [[GitHub](#)]

Tools: Node.js, Express.js, RabbitMQ, CQRS, Docker

- Designed an event-driven analytics platform using RabbitMQ to process real-time events efficiently.
- Applied CQRS to separate write services and analytics read models, improving query speed.
- Developed asynchronous event consumers to process activity streams with sub-second latency.

• Distributed Rate Limiting Service [[GitHub](#)]

Tools: Node.js, Express.js, Redis, Docker

- Engineered a Redis-based rate limiter to regulate API requests across microservices.
- Implemented distributed API rate limiting using the Sliding Window Log algorithm with Redis.
- Ensured strong consistency under high concurrency using Redis atomic operations and Lua scripts.

• Multi-Tenant SaaS Platform [[GitHub](#)]

Tools: Node.js, Express.js, PostgreSQL, React, Docker, JWT

- Architected a multi-tenant SaaS platform supporting with RBAC-based access control.
- Implemented JWT-based authentication and authorization for secure access control.
- Containerized services with Docker Compose, cutting setup and deployment time.

Experience

• Technical Hub [[Link](#)]

AWS Cloud Intern

June 2025 - July 2025

Kakinada, India

- Developed automated backup solutions using AWS (S3, Lambda), enhancing data reliability and reducing manual intervention.
- Automated start and stop of AWS EC2 instances using AWS Lambda and scheduled triggers.

• SBTET AP [[Link](#)]

Front-End Development Intern

Jan 2023 - June 2023

Mangalagiri, India

- Built responsive dashboards and UIs for affiliation workflows, boosting efficiency.
- Collaborated with an Agile team for UI/UX design and performance tuning.

Certifications & Achievements

- **Docker Essentials: A Developer Introduction**, [IBM](#)
- **Postman API Fundamentals Student Expert**, [Postman](#)
- **Programming Essentials in C++**, Cisco
- **Solved 950+ coding problems** across [LeetCode](#), [GeeksforGeeks](#), and [CodeChef](#).
- **Top 10 Finalist** in Project Space 2025, securing 9th place out of 123 teams.
